Location:	South Wales
Duration:	24 months install and on-going Maintenance for ABUHB
Services:	Fire Detection, Intruder Alarm, CCTV, Access Control Access Control Maintenance

“Trinity were proactive in finding the right product solutions to do the job. They are a main technology centre for Gent, a manufacturer that we have used in the past and trust. Trinity were also able to find practical bespoke system solutions for the demanding security requirements”

**Lorne Stewart for ABUHB
Project Manager**

Project Overview

The Aneurin Bevan University Health Board was launched in 2009 and covers 2 district general, 2 Local General and 11 supporting hospital premises. Since 2010, Trinity has installed over 600 access controlled doors and now maintains the access control system across all sites via an advanced centrally operated virtual system utilising the Health Board’s IP infrastructure. This ‘state of the art’ system is limitless in its capacity for additional sensors to be installed at any time anywhere across all sites, thus giving the ultimate security required for the safety of all healthcare staff and patients.
