Selfridges Property**

### Project Overview

Selfridge’s flagship store in Oxford St, London (UK’s 2<sup>nd</sup> largest store) operates like a shopping centre but with the urgency of an airport. In order to quickly respond to the daily demands, Trinity has an engineer on site 7 days/week, with an additional 2 engineers working 5 nights a week. Trinity’s experienced team covers on-going Fire Alarm and Suppression maintenance, large refurbishment project work, and shorter term projects for Retail Concessions.
