

Case Study

- Sector:** Education
- Client:** University of Warwick
- Location:** Warwick
- Duration:** 10 year Planned Preventative Maintenance contract
- Services:** Fire Alarm, Intruder Alarm, Fire Suppression, Sprinklers, Deaf Alerter and Disabled Refuge Systems

Project Overview

Across a 290 hectare campus, Trinity is providing both Planned and Preventative Maintenance services to over 200 buildings, with more coming online all the time.

With 200+ Fire Alarm panels & over 45,000 associated devices to maintain, the dedicated site based engineering team consistently provide fast response times and greater efficiencies across the whole campus.

In addition, Trinity's strategic approach to the ongoing Maintenance requirements, when coupled with an 'open book' policy to costs, has ensured a close working partnership with the client.
