

# Clean Agent Fire Suppression Options in a Changing Regulatory Landscape

## Who Needs to Know?

Fire Engineers, M&E Consultants, Architects, Facilities Managers, End Users or Anyone involved in the Specification, Design, Installation and Use of Gaseous Fire Suppression Systems.

## CPD Course Details:

This CPD session provides a background on how gaseous suppression agents work and the key factors that should be considered when selecting clean extinguishing agents and systems for the protection of critical assets. The session will also cover how environmental regulations in particular are developing and can affect that selection process.
