

An Overview of British Standard 5839 pt 1

This presentation is an overview of the revised British standard BS 5839-1: 2017, which is the Code of Practice for system design, installation, commissioning and maintenance of fire detection and alarm systems within the UK and Northern Ireland.

It is aimed at advising any professional party involved in providing a system, with advice on what is required in each step of the process, as well as explaining to the end user and their service provider what their ongoing responsibilities are during the life of the system.

Finding time to keep up to date with the latest changes and developments in the fire safety industry can be challenging. In today's business environment it has become more important than ever to stay at the cutting edge.

NOTIFIER by Honeywell has developed a series of Continuing Professional Development accredited seminars addressing some of today's key topics in fire safety. These complimentary seminars can be arranged at a time and place to suit you.

NOTIFIER by Honeywell is the world's largest manufacturer and supplier of engineered fire alarm systems. With over 400 Engineered Systems Distributors worldwide, and regional support on every continent, we have the flexibility to meet our customers' most demanding requirements.
