Comply, Stay Alive!

A highly interactive and eye-opening CPD which focuses on a real life fatal fire incident in a care home. Explore what went wrong and gain knowledge of how the latest standards and fire technology is being implemented to prevent similar tragedies.

Duration – 1 hour

Who should attend – Designers, installers and maintainers of fire detection and alarm systems

External Approval – CPD Service

Course details

This CPD investigates a tragic fire incident that occurred at a care home in Scotland. It follows a video developed by the Scottish Fire Brigade that highlights, in detail, what went wrong and how lives could have been saved.

During the session you will gain an understanding of the key stages involved in the life of a fire system to ensure everything possible is done to limit the risk to life and property. You will also gain knowledge of the latest standards and how technology is being used to prevent similar fatal accidents occurring in the future.

Certificates of completion are awarded to attendees completing the course.
