

DETECTOR SELECTION AND FALSE ALARM PREVENTION

Duration

1 hour

Who should attend

M&E Consultants, End Users, Architects or those involved in the process of providing or maintaining an automatic fire detection system

External Approval

CPD Service

This presentation contains guidelines for improving alarm system design. It shows how it is possible to strike a balance between detecting real fires quickly whilst minimising the risk of false alarms. This is not a new issue but has become more sensitive in light of new legislation which has seen Fire Authorities reducing the level of response depending upon the number of false alarms from individual sites.

Finding time to keep up to date with the latest changes and developments in the fire safety industry can be challenging. In today's business environment it has become more important than ever to stay at the cutting edge.

Notifier by Honeywell has developed a series of Continuing Professional Development accredited seminars addressing some of today's key topics in fire safety. These complimentary seminars can be arranged at a time and place to suit you.

Notifier by Honeywell is the world's largest manufacturer and supplier of engineered fire alarm systems. With over 400 Engineered Systems Distributors worldwide, and regional support on every continent, we have the flexibility to meet our customers' most demanding requirements.
