

DEMYSTIFYING THE DESIGN AND USE OF VOICE ALARM/PA SYSTEMS

Duration

1.5 hours

Who should attend

M&E Consultants, End Users, Architects or those involved in the process of providing or maintaining an automatic fire detection system

External Approval

CPD Service

This presentation aims to give an awareness of the requirements of the British Standard BS 5839 Part 8: 2013 to someone who is new to the task of providing a Voice Alarm system. It provides some background research and explains the benefit of having voice alarm messages, as opposed to simple alarm sounders. It will also provide some advice on what to consider when designing a system, identifying some of the problems and their solutions especially with regard to audibility and intelligibility.

Finding time to keep up to date with the latest changes and developments in the fire safety industry can be challenging. In today's business environment it has become more important than ever to stay at the cutting edge.

Notifier by Honeywell has developed a series of Continuing Professional Development accredited seminars addressing some of today's key topics in fire safety. These complimentary seminars can be arranged at a time and place to suit you.

Notifier by Honeywell is the world's largest manufacturer and supplier of engineered fire alarm systems. With over 400 Engineered Systems Distributors worldwide, and regional support on every continent, we have the flexibility to meet our customers' most demanding requirements.
