

# Equality of access for people with hearing loss

- Hearing aid user experience
- Legislation
- Principles of assistive listening technology and hearing loops

Trinity Fire and Security, in conjunction with Ampetronic, offer free Equality of Access seminars aimed at consultants, architects, facility managers, disability access officers, systems sales professionals and technology advocates.

Accredited by CPD, this course covers why assistive listening is necessary, what type of systems are available, suitable applications and why all assistive listening systems should be frequently tested.

Our Equality of Access seminar is delivered by one of our expert engineers at a venue of your choice.

## Learning outcomes:

- Understand the need for assistive listening systems
- Legal requirement for assistive listening systems
- Available assistive listening technologies
- Assistive listening applications and technology suitability
- Hearing loop principles and operational standards
- Hearing loop system design variations and considerations

**Duration:** 45-60 minutes

**To book:** [click here](#)  
or call 0844 335 1910

**Cost** Free  
Lunch is provided
